

## APPLICATION FOR THE 2012-2013 FOODSHED GRADUATE FELLOWSHIP

Does your graduate research topic relate to local food systems, sustainable agriculture, food geography, planning, water resources, biodiversity, acequias, land art and ecology, economics, environmental communication, or anthropology? If so, why not apply for this \$40,000 fellowship?

We are pleased to announce the 2012-2013 UNM Collaborative for Foodshed Development Graduate Fellowship. This fellowship is provided via a grant from the USDA for Hispanic Serving Institutions.

The goal is to serve as a support system by making resources, networks and skills available to students for a successful completion of their graduate degree.

A scholarship will be awarded to an exceptional student in the Food/Agricultural and Sustainability field to continue their graduate education and research development for a period of two years beginning Spring 2012 through Fall 2012 and Spring 2013.
