

# SeedBroadcast

Join in the seedy action and **SWAP**

**March 17 - March 31, 2017**

Bring seeds to swap, pick-up seeds to grow, post local food and seed news on the SWAP bulletin board, draw your favorite Seed Story, and listen to Seed Stories from around the country.

## **SWAP at Re|Source: Unpacking the Archive**

University of New Mexico  
George Pearl Hall #195  
Rainosek Gallery  
M - F 8am - 5pm

SeedBroadcast: [www.seedbroadcast.org](http://www.seedbroadcast.org)

**SWAP** is a community-based, interactive, grow kit for open-pollinated seed and resource sharing and for uplifting the Culture in agri-Culture through art and story-telling.

March 17 – 31, 2017  
University of New Mexico  
George Pearl Hall  
Rainosek Gallery  
Hours: M-F 8am – 5pm

Here is how you can participate:

- Drop-off your saved seeds to share, make sure these are open-pollinated and labeled with type of seed and year collected.
- Pick up seeds. Please only take what you need, place in an envelope, label your envelope and be sure to leave some for others. Also, grow these seeds out, save some seeds, and next year share these with your neighbors.
- Post local seed and gardening info on the bulletin board to share with others.
- Take some time to sit down and draw out a Seed Story to post on the bulletin board.
- Listen to Seed Stories recorded by SeedBroadcast.
- Contact SeedBroadcast if you would like to record your own audio story.

We will also be showing documents from Seed Libraries around the country... what would a Seed Library at UNM look like?

SeedBroadcast will be hosting **SWAP** in conjunction with the exhibition: Re|Source: Unpacking the Archive.

SeedBroadcast is a collaborative project exploring bioregional agri-Culture and seed action through collective inquiries and hands-on creative practices. SeedBroadcast holds the belief that it is a human right to save seeds and share their gifts, to grow food and share its abundance, and to cultivate grassroots wisdom and share its creativity. These are the roots of agri-Culture to be broadcast. SeedBroadcast encourages communities to keep agri-Culture alive and vibrant through working together in creative and inspiring ways. Spending time with people on their farms and in their gardens, at seed exchanges and community gatherings, SeedBroadcast digs deep into the oft-unheard stories of local agri-Culture. Our work includes community-based projects, installations, dialogues, creative actions, and cross-country tours with the Mobile Seed Story Broadcasting Station. Interdisciplinary collaboration is a founding principal of SeedBroadcast activities where cohorts from diverse backgrounds work together as critical partners of inquiry and creative production.
