

Be a part of the sustainability community at UNM! Enroll for Fall 2020 to learn about sustainability and get involved on campus and beyond.

SUST-1134

Introduction to Sustainability Studies

• SUST 1134-002 (CRN 63733) •
TR 9:30 – 10:45am Mitchell Hall 218

• SUST 1134-003 (CRN 63734) •
Online

Instructor: Jessica Rowland
Questions? Email: jrowland@unm.edu

How can we, as humans, shape a more sustainable future? This interdisciplinary course will introduce you to a wide variety of challenges as well as creative, integrated solutions. We will explore topics such as climate change, renewable energy, water consumption, food production, green building, urban redesign, socially responsible business, microlending, alternative progress indicators, and more. Through writing and discussion, we'll hone our understanding of the issues and develop our communication skills. In addition, we will take action by engaging in sustainable projects on campus, in the community, and at home. Join us! More info: <http://sust.unm.edu>
